

Community Crisis Preparedness Workshops Evaluation Compilation

Explanation:

Evaluations were distributed to the participants of the Community Crisis Preparedness Workshops held in Craighead County and Ouachita/Calhoun Counties in Arkansas, Seneca County in New York, and Luna County in New Mexico, at the end of the workshops' formal presentations. Each participant had an opportunity to complete the evaluation form. The evaluation had the option of anonymity if the participant so chose. The evaluation form collected both qualitative and quantitative data. The quantitative data was entered into Microsoft Excel and imported into Number Cruncher Statistical System (NCSS) for analysis. Both a Data Screening and Descriptive Statistics report were compiled. This evaluation compilation displays many of comments from each workshop session as well as the evaluation conclusion from each session. The entire evaluation reports from each session are included with this compilation.
